

HYBRID PERFORMANCE TRAINING

Nippard-Science Optimized · Runner Integrated · Hypertrophy Focused

12-Week Recomposition Phase · May 2026

DAY	EXERCISE	TIER	SETS	REPS	RIR	REST	KEY CUE / NIPPARD SCIENCE / RUNNER NOTE
PUSH Mon	Incline DB Bench Press (45°)	A	5	7-10	1-2	2-3 min	75° elbow angle; full stretch at bottom. Stretch-biased loading hits upper pec optimally. No interference with triceps.
PUSH Mon	DB Shoulder Press (seated neutral)	A	5	8-12	2	90 sec	Full range; neutral grip protects wrists. Full ROM overhead activates all three delt heads. Stability over speed.
PUSH Mon	Incline DB Y-Raise (20-30°)	S	3	12-15	1	60 sec	Flare Y shape. S-tier Nippard pick; even tension profile. Scapular stability -> better running posture.
PUSH Mon	Cable Chest Fly (low pulley)	A	3	12-15	1	60 sec	Elbows meet; full stretch at bottom. Constant cable tension through full ROM.
PUSH Mon	Overhead Cable Extension (rope)	S	3	10-14	1	60 sec	Full overhead stretch; feel tricep long head load. S-tier; 40% more growth vs pushdown.
PUSH Mon	DB Lateral Raise (elbow-lead)	A	4	15-20	0	45 sec	Elbow above wrist; control the negative. Slight forward lean aligns cable/delt pulleys.
PULL Wed	Lat Pulldown (wide grip)	A	4	8-12	1	2 min	Full stretch at top; drive elbows down. Same activation as pull-ups. Replaces pull-ups while running.
PULL Wed	Chest-Supported DB Row	A	5	10-14	0	90 sec	Chest on bench removes lower back. Eliminates spinal erector fatigue. Upper back strength = maintenance.
PULL Wed	Sideways One-Arm Rear Delt Fly	S	3	15-20	1	60 sec	Sweep across body. S-tier; full ROM and stretch. Rear delt strength = shoulder health for running.
PULL Wed	Face Pull (rope eye height)	A	3	15-20	0	60 sec	External rotation; finish beside ears. Protects shoulder for pressing and running longevity.
PULL Wed	Incline DB Curl - Bayesian	S+	3	10-14	1	60 sec	Arm behind torso; maximum stretch. ONLY S+ bicep in Nippard rankings.
PULL Wed	Zottman Curl	S	3	10-12	1	90 sec	Inner up / supinate on negative. Overloads eccentric; brachialis development = arm strength.
LEGS Sat	Leg Press (feet high for glutes)	Leg S	4	8-12	1-2	2-3 min	Feet high shifts load to glutes and hams. Nippard Leg S-tier. Don't lock knees.
LEGS Sat	DB Romanian Deadlift	A	5	10-14	2	2 min	Feel ham stretch at stretched position. Hypertrophy peaks when loaded at length. Addresses running form.
LEGS Sat	DB Bulgarian Split Squat	A	3	10-12	1	90 sec	Foot forward, glute emphasis. Corrects L-R imbalances. Unilateral strength transfer.
LEGS Sat	Seated Leg Curl	Leg S	3	12-15	1	60 sec	Loaded stretch at extension. Nippard Leg S-tier. Critical for runner glute-ham tie.
LEGS Sat	45° Back Extension (BW/DB)	S	3	12-15	1	60 sec	Round upper back slightly to isolate glutes. Nippard S-tier. Glute strength = running economy + posture.
LEGS Sat	Standing Calf Raise	Leg S	4	15-20	0	45 sec	Full stretch; no bouncing. Nippard Leg S-tier. Runner calves need strength not just endurance.

WEEKLY STRATEGY

DAY	ACTIVITY	TYPE	GOAL / RULE
Monday	PUSH — Chest / Shoulders / Triceps	GYM	CNS fresh — push hard
Tuesday	Run or Rest (your call)	RUN / REST	If running: easy Zone 2 only
Wednesday	PULL — Back / Biceps	GYM	6+ hrs gap from any run
Thursday	Run or Rest (your call)	RUN / REST	Tempo runs allowed — gym tomorrow is upper only
Friday	RUN — Mandatory	RUN	Non-negotiable run day
Saturday	LEGS — Quads / Hams / Glutes / Calves	GYM	After Friday run — rest well
Sunday	Full REST + Sauna + Steam	RECOVERY	Adaptation happens here

PROGRESSIVE OVERLOAD PROTOCOL

PHASE	WEEKS	ACTION	EXAMPLE (DB Incline)
Foundation	1-2	Learn form. Hit TOP of range on last set.	22 kg x 10-10-10-12
Load	3-4	Add 2kg when ALL sets hit top of range.	24 kg x 10-10-10-10
Push	5-6	Last set: RIR 0. Push to near failure.	24 kg x 10-10-10-12
Add weight	7	New weight. Drop to bottom of range.	26 kg x 8-8-8-9
Deload	8	-40% sets. Same weight. Active recovery.	24 kg x 6-6
Repeat	9-12	New cycle with stronger baseline.	26 kg x 10-10-10-12

SAUNA PROTOCOL

Post-gym: 80-90°C (15-20 min) for GH spike.

Post-run: Steam room (10-15 min) for lactate clearance.

Sunday: Sauna + Cold shower contrast (20m + 2m).

12-WEEK TARGETS

Body Fat %: 17.2% -> 11-13%

Muscle Mass: 37.6kg -> 40kg+

InBody Score: 82 -> 90+
